MOUNTAIN HOME AIR FORCE BASE ANNUAL STORMWATER COMPLIANCE REVIEW

Mountain Home, Idaho

Completed September 2003

Forty facilities at the Mountain Home Air Force Base (AFB) were reviewed as part of an annual review process regarding the Industrial Stormwater National Pollutant Discharge Elimination System (NPDES) General Permit for Industrial Activities. Facilities were assessed on permit and control-measure compliance, management practices, training, record-keeping, and organization. The annual report and revisions to the Stormwater Pollution Prevention Plan and facility handbooks were generated.

US 20 HITT ROAD AND ST. LEON INTERCHANGES

Idaho Falls, Idaho

Completed February 2002

Assessed construction activities and bridge work in and around Willow Creek. The assessment included stream evaluation, surveying, and stormwater-runoff impact analysis. Multi-agency coordination was performed to develop best management practices to avoid or minimize impacts.
